EXPERIENCE

- FMV Isik University** 06/2018 - present
Research Assistant Istanbul
 - Assisted in the research of a TÜBİTAK-granted project: Development of an economical and innovative joining concept for hybrid materials that does not require filler material.
 - Managed Materials Science Laboratory, Measurements and Instrumentation, and Mechanical Engineering Laboratory courses. Supervised students in the laboratory, and graded laboratory reports.
 - Assisted in the development of new course materials and assignments by writing and revising course materials, and developing new assignments and assessments.
 - Also taught and supervised students in the Machine Design and Engineering Drawing lab sections.
- Turkish Standards Institution** 06/2017 - 01/2019
Inspector Istanbul
 - Planned and executed inspections in accordance with instructions provided by TSE (Turkish Standards Institution), harmonized standards (such as EN 81-1, EN 81-20, EN 81-70, etc.), and applicable legal regulations.
 - Conducted thorough inspections to assess the safety, functionality, and compliance of the inspected equipment or systems.
 - Documented inspection findings and prepared comprehensive reports.
- Universal Certification** 02/2016 - 07/2016
Welding Engineer Istanbul
 - Prepared and approved qualification documents, including Welding Procedure Specifications (WPS), Procedure Qualification Records (PQR), and Welder's Test Certificates.
 - Worked extensively with various welding codes and standards, such as AWS D1.1, EN 1090, and ASME BPVC.
 - Conducted inspections and assessments to verify compliance with welding standards and codes.
- Merberk Engineering** 09/2015 - 02/2016
R&D Engineer Istanbul
 - Involved in an R&D project to create a 3D printer and subsequently a unique 3D Metal Printer.
 - Successfully completed the development of the 3D printer, but the project was discontinued before creating the metal 3D printer due to a lack of grants or funding.
- Mast Metal Steel Construction** 09/2014 - 09/2015
Quality Control Engineer Kocaeli
 - Contributed to the establishment of the Quality Management System (QMS) at Mast Metal Steel Construction as the Management Representative.
 - Conducted inspections after welding, demonstrating a strong interest in quality control.
 - Worked closely with customers, primarily from IHI Corp., organizing inspections and planning NDT procedures.
 - Delivered accurate quality records in accordance with Inspection and Test Plans (ITPs).
 - Upheld high-quality standards and efficiently managed the quality control process throughout the tenure.

EDUCATION

- Istanbul Technical University** 2022 - present
Ph.D. Degree in Mechanical Engineering CGPA: 3.17/4.00
Relevant coursework: Computer Vision, Medical Image Computing, Big Data Technologies and Applications
- Istanbul Technical University** 2016 - 2022
M.Sc. Degree in Materials and Manufacture GPA: 3.13/4.00
Thesis topic: Investigation of joining metals and fiber reinforced thermoplastic composites by hot pressing method
- Gedik Educational Foundation** 2014 - 2015
IWE (also EWE) Degree certified by the International Institute of Welding (IIW) -
- Bulent Ecevit University** 2008 - 2014
B.Sc. Degree in Mechanical Engineering GPA: 2.48/4.00

PROJECTS

- **An Earthquake Research Project** 2023 (ongoing)
Team Member
 - Tools & frameworks used: Apache NiFi, Apache Spark, AWS S3, SeisBench
 - Currently involved in a research project within a scientific research group, utilizing Big Data Tools and the SeisBench framework in the context of Istanbul.
- **Brain Tumor Segmentation (BraTS Challenge Participation)** 2023 (ongoing)
Personal Project — Information 
 - Tools & frameworks used: PyTorch, nnUNet, SimpleITK
 - Participated in the International BraTS challenge, utilizing nnUNet to develop a model for accurate brain tumor segmentation in multi-modal MRI data.
- **Yet Another Earthquake Project (YAEP) by Team EGAL** 2023
Project Coordinator — Repository  / Paper 
 - Tools & frameworks used: Apache NiFi, Apache Kafka, Apache Spark, AWS S3, Elasticsearch, Kibana
 - Coordinated an end-to-end project focused on earthquake visualization and correlation analysis with electric field data. Led the team in utilizing a suite of Big Data Tools to seamlessly acquire, integrate, preprocess, analyze, and visualize the data. Leveraged real-time data streaming, advanced analytics, and interactive visualization techniques to uncover significant relationships between earthquakes and electric field data.
- **Segmentation Based on Swin-Unet** 2023
Personal Project — Repository  / Paper 
 - Tools & frameworks used: PyTorch, Swin-Unet, SimpleITK
 - Studied automated medical image segmentation using the Swin-Unet model. Achieved accurate results through data preprocessing, training, and GPU acceleration.
- **Age Regression from Brain MRI Images** 2023
Personal Project — Repository  / Paper 
 - Tools & frameworks used: Scikit-learn, SimpleITK
 - The project involved conducting a kinematic analysis of a quadcopter's cruising and take-off movements. Using MSC ADAMS software, equations were derived and implemented in MATLAB for visualization.
- **Weld Defect Detection Using a Small Dataset with U-Net** 2022
Personal Project — Repository  / Paper 
 - Tools & frameworks used: PyTorch, U-Net
 - Utilized the GDXray dataset, specifically for weld X-ray images, and implemented the U-Net architecture.
- **Flaw Detection in Radiographic Weld Images Using Morphological Approach** 2016
Personal Project - Paper 
 - Tools & frameworks used: MATLAB, Image Processing Toolbox
 - Implemented an algorithm inspired by RS Anand and P Kumar's research for flaw detection in radiographic weld images using a morphological approach. It aimed to provide an automated and robust method for flaw detection.
- **Kinematic Analysis and Design of a Quadcopter** 2014
Personal Project
 - Tools & frameworks used: MSC ADAMS, MATLAB
 - The project involved conducting a kinematic analysis of a quadcopter's cruising and take-off movements. Using MSC ADAMS software, equations were derived and implemented in MATLAB for visualization.

TECHNICAL SKILLS AND INTERESTS

Languages: Turkish (Native), English (Advanced)

Developer Tools: AWS, Linux, Apache NiFi, Apache Kafka, Apache Spark, Elasticsearch, Kibana

Frameworks: PyTorch, TensorFlow, Keras, Darknet (YOLO), OpenCV, Scikit-Learn

Licenses: A+B Class Driver, PADI Advanced Open Water Diver (AOWD), CMAS ** Diver, FAI Beginner Pilot

Area of Interest: Computer Vision, Medical Image Computing, Nondestructive Evaluation, Big Data Applications

CERTIFICATES

- **Google Developers Machine Learning Bootcamp 2023**  (Google - inzva) ongoing
- **Certified Associate in Project Management (CAPM) preparation training**  (PMI TR - ITU) 2023
- **Introduction to Big Data with Spark and Hadoop**  (IBM, Coursera) 2023
- **Introduction to Apache NiFi | Cloudera DataFlow - HDF 2.0**  (Udemy) 2023
- **Deep Learning Study Group**  (inzva) 2020
- **Elevator Inspector Personnel** (Turkish Standards Institution) 2017
- **Internal Auditor** (KYS Consulting) 2014
- **IMS (ISO 9001:2008, ISO 14001:2004, and OHSAS 18001)** (KYS Consulting) 2014
